RE: Letter of Recommendation for Harshul Hareshkumar Shukla
Date: 2025-01-27

To Whom It May Concern,

I am writing this letter of recommendation as a Professor in the Applied Computer Science & IT, specifically within the Applied Network Infrastructure and System Administration program, to endorse Harshul Hareshkumar Shukla. Throughout his academic journey, Harshul has consistently impressed me with his skills and integrity in one of the program's toughest courses.

Harshul has continually demonstrated a strong grasp of complex concepts and tackled difficult scenarios with ease. He brings a creative problem-solving approach to his work and has consistently shown the highest level of academic achievement as well as interpersonal soft skills.

What sets Harshul apart is not just his technical skillset, but also his combination of hands-on skills, relevant industry experience, exceptional communication, strategic thinking, and leadership. Harshul is a team player who often assists his peers in understanding intricate concepts and ensures that the work delivered by the team is of the highest standards and quality. For example, he frequently mentors his fellow students and offers supplemental classes for those struggling with my content.

Harshul's work ethic is outstanding. He demonstrates a level of commitment and diligence that is beyond exceptional, often going far above the required coursework. He has a natural aptitude and passion for learning, which I believe will serve him well in the future. His dedication to delivering exceptional results makes him a prime candidate for any organization looking for a valuable individual who settles for nothing but outstanding results.

His combination of work ethic, talent, and creativity will be a boon to any organization, and as such, he has earned my endorsement as a valuable candidate for any position.

Please feel free to contact me if you need any additional information or have any questions.
Sincerely,

Serhiy Trunkin
